Contributors	xvii
Preface	xxi

Part I

Introduction

1. Concepts and methodologies for agricultural water management

*Prashant K. Srivastava, Swati Suman, Varsha Pandey,
Manika Gupta, Ayushi Gupta, Dileep Kumar Gupta,
Sumit Kumar Chaudhary and Ujjwal Singh*

1. Introduction	3
2. Irrigation water management techniques	4
2.1 HYDRA	4
2.2 Decision support system for agrotechnology transfer (DSSAT)	5
2.3 Hydrus	6
2.4 MOPECO model	8
2.5 Linear optimisation model for efficient use of irrigation water	8
2.6 A network flow model for irrigation water management	10
2.7 Bayesian data-driven models for irrigation water management	11
2.8 CropSyst model	13
2.9 Water balance method	14
2.10 Irrigation practices	15
3. Conclusion	16
References	17

2. Traditional water management in India

R.K. Singh, M. Mruthyunjaya and Prashant K. Srivastava

1. Introduction	21
2. The role of traditional knowledge	22
3. Revisiting some traditional practices	22
3.1 Bamboo drip irrigation system	22
3.2 Zabo system	23
3.3 Katta	24

3.4	<i>Madakas/Johads/Pemghara</i>	24
3.5	<i>Eri</i>	25
3.6	<i>Kuhl</i>	25
3.7	<i>Surangam</i>	25
3.8	<i>Jackwells</i>	26
3.9	<i>Ramtek model</i>	26
3.10	<i>Pat system</i>	27
3.11	<i>Zings</i>	27
3.12	<i>Khadins</i>	27
3.13	<i>Swing basket</i>	27
3.14	<i>Moat (rope-and-bucket lift)</i>	28
3.15	<i>Dhekli</i>	28
3.16	<i>Persian wheel</i>	28
3.17	<i>Don</i>	29
3.18	<i>Archimedean screw</i>	29
3.19	<i>Paddle wheel</i>	29
4.	Conclusion	29
	References	30

3. Application of geospatial technology in agricultural water management

*Ram Kumar Singh, Pavan Kumar, Semonti Mukherjee,
Swati Suman, Varsha Pandey and Prashant K. Srivastava*

1.	Introduction	31
1.1	Conventional geospatial techniques for water resource management	32
1.2	Advanced techniques	33
2.	Way forward	38
	References	39

Part II

Conventional techniques

4. Treated waste water as an alternative to fresh water irrigation with improved crop production

*Ayushi Gupta, Nitin Kumar Sharma, Shaily Bhardwaj and
Prashant K. Srivastava*

1.	Introduction	49
2.	Materials and methods	51
2.1	Experimental sites	51
2.2	Materials	51
2.3	Experimental design	52
2.4	Methods	53
3.	Results and discussion	55
3.1	Physicochemical properties of soil	55
3.2	Physicochemical properties of water samples	56
3.3	Heavy metal analysis	56

3.4	Germination and vegetative growth of seedlings	57
3.5	Biochemical/nutritional studies	57
4.	Conclusion	63
	Acknowledgements	63
	References	63
5.	Assessing the suitability of Ghaghra River water for irrigation purpose in India	
	<i>Sandeep Kumar Gautam, Jayant K. Tripathi and Sudhir Kumar Singh</i>	
1.	Introduction	67
2.	Study area	69
3.	Material and methods	69
4.	Results and discussion	71
4.1	Physicochemical characteristics (pH, EC, TDS and TH)	71
4.2	Irrigation indices	73
5.	Management plan	78
6.	Conclusions	79
	Acknowledgements	79
	References	79
6.	Desiccation-tolerant rhizobacteria: a possible approach for managing agricultural water stress	
	<i>Ajay Shankar, Anjali Singh, Shivani Chaudhary and Vishal Prasad</i>	
1.	Introduction	83
1.1	Drought	83
1.2	Effect of drought stress on plant growth and development	84
1.3	Concept behind drought adaptations	84
1.4	Bacterial response against water stress in soil	85
1.5	Bacterial-mediated drought tolerance in crop plants	85
2.	Rhizobacteria	86
3.	Plant-microbe interaction	88
4.	Screening and characterization of rhizobacteria for water-stress management in agriculture system	89
5.	Rhizobacteria as a tool for water-stress management in agriculture system	91
5.1	Improve root system architecture for water uptake	91
5.2	Improve shoot growth	92
5.3	Relative water content	92
5.4	Osmotic adjustment	93
5.5	Plant growth regulators	93
6.	Conclusion	94
	Acknowledgement	94
	References	96

7. Irrigation water quality appraisal using statistical methods and WATEQ4F geochemical model

*Sudhir Kumar Singh, Ram Bharose, Jasna Nemčić-Jurec,
Kishan S. Rawat and Dharmveer Singh*

1. Introduction	103
2. Materials and methods	104
2.1 Study area	104
2.2 Collection of sample and analysis	105
2.3 Irrigation indices	106
2.4 Statistical analysis	111
2.5 WATEQ4F model	112
3. Result and discussions	112
3.1 Hydrogeochemistry of water	112
3.2 Correlation matrix	121
3.3 Principal component analysis	121
3.4 Cluster analysis	126
3.5 Irrigation indices	126
3.6 Saturation index	131
4. Conclusion	136
References	136

Part III

Earth observation techniques

8. Estimation of potential evapotranspiration using INSAT-3D satellite data over an agriculture area

Prachi Singh, Prashant K. Srivastava and R.K. Mall

1. Introduction	143
2. Materials and methodology	145
2.1 Study area	145
2.2 INSAT-3D	146
2.3 Hamon's method	148
3. Performance analysis	149
4. Results and discussions	150
4.1 Evaluation of temperature data from INSAT-3D and ground base	150
4.2 Comparative assessment of evapotranspiration products	151
5. Conclusions	152
References	153

9. Estimation of evapotranspiration using surface energy balance system and satellite datasets

*Garima Shukla, Prasoon Tiwari, Vikas Dugesar and
Prashant K. Srivastava*

1. Introduction	157
2. Materials and methods	160
2.1 Study area	160

3. Data used and methodology	161
4. Theory of SEBS	162
4.1 Surface radiation balance equation	162
4.2 Soil heat flux (G)	167
4.3 Sensible heat flux (H)	167
4.4 Latent heat flux ($\lambda \cdot ET$), instantaneous ET (ET_{inst})	169
5. Results and discussion	169
5.1 Land-use/Land-cover classification (LULC)	169
5.2 Albedo	170
5.3 Normalized difference vegetation index (NDVI)	170
5.4 Land surface temperature (LST)	170
5.5 Net radiation flux (R_n)	172
5.6 Soil heat flux (G)	177
5.7 Instantaneous evapotranspiration (ET)	177
6. Conclusion	180
References	180

10. Large-scale soil moisture mapping using Earth observation data and its validation at selected agricultural sites over Indian region

Dharmendra Kumar Pandey, Deepak Putrevu and Arundhati Misra

1. Introduction	185
2. Study area	186
3. Data and methodology	187
3.1 SMAP-derived soil moisture data products (SAC-ISRO)	187
3.2 In-situ soil moisture data	189
4. Validation of soil moisture (SAC-ISRO) products using in-situ data	189
4.1 Accuracy assessment based on metrics computation	194
4.2 Validation approach for coarse-scale satellite-derived data products based on scaling method	195
5. Results and discussion	196
6. Conclusion	202
Acknowledgements	205
References	205

11. A preliminary evaluation of the 'simplified triangle' with Sentinel-3 images for mapping surface soil moisture and evaporative fluxes: results obtained in a Spanish savannah environment

George P. Petropoulos, Ionuț Șandric, Andrew Pavlides and Dionissios T. Hristopulos

1. Introduction	209
2. Materials	210
2.1 Study sites and in-situ data	210
2.2 Sentinel data: acquisition and pre-processing	211

3. Methods	213
3.1 Statistical analysis	214
4. Preliminary results	216
5. Discussion	218
6. Conclusions	221
Acknowledgements	222
References	222

Part IV

Computational intelligence techniques

12. Artificial neural network for the estimation of soil moisture using earth observation datasets

Sumit Kumar Chaudhary, Jyoti Sharma, Dileep Kumar Gupta, Prashant K. Srivastava, Rajendra Prasad and Dharmendra Kumar Pandey

1. Introduction	227
2. Materials and methods	230
2.1 Data used	230
2.2 Performance indices	230
2.3 Artificial neural network architecture and modelling	231
3. Results and discussions	232
3.1 Optimization of ANN models	232
3.2 Performance analysis of ANN models	233
4. Conclusion	235
Acknowledgement	236
References	236

13. Soil moisture retrieval from the AMSR-E

Dleen Al-Sharafany

1. Introduction	241
2. Microwave theory	242
3. Surface roughness and vegetation effects	243
4. Atmospheric effects	245
5. Soil moisture retrieval for the Brue catchment using AMSR-E	245
5.1 Modelling approach	245
5.2 LPRM calibration based on event-based water balance equation	247
5.3 LPRM calibration based on continuous PDM storage predictions	256
6. Conclusions	274
References	276

14. Bistatic scatterometer for the retrieval of soil moisture

Dileep Kumar Gupta, Rajendra Prasad and Prashant K. Srivastava

1. Introduction	279
2. Materials and methods	281
2.1 Bistatic scatterometer measurement and computation of bistatic scattering coefficients	281
2.2 Soil moisture measurement	283
2.3 Soil surface roughness measurement	285
2.4 Statistical performance indices	287
3. Result and discussions	288
3.1 Soil surface roughness analysis	288
3.2 Angular response of bistatic scattering coefficient	288
3.3 Estimation of soil moisture using ANN	294
4. Conclusion	302
References	303

15. Soil water content influence on pesticide persistence and mobility

Manika Gupta, N.K. Garg and Prashant K. Srivastava

1. Introduction	307
2. Methods	309
3. Results and discussion	320
4. Conclusion	324
Acknowledgements	324
References	325

Part V

Geospatial techniques

16. Irrigation water demand estimation in Bundelkhand region using the variable infiltration capacity model

Varsha Pandey, Prashant K. Srivastava, Pulakesh Das and Mukunda Dev Behera

1. Introduction	331
2. Study site	333
3. Materials and methods	333
3.1 Datasets	333
3.2 Calibration and validation of VIC	335
3.3 Soil moisture deficit index (SMDI)	336
4. Results and discussion	336
5. Conclusions	345
References	345

17. Drainage network analysis to understand the morphotectonic significance in upper Tuirial watershed, Aizawl, Mizoram

Binoy Kumar Barman, Gautam Raj Bawri, K. Srinivasa Rao, Sudhir Kumar Singh and Dhruvesh Patel

1. Introduction	349
2. Study area	350
3. Geology and geomorphology	351
4. Materials and Methods	352
5. Estimation of the hypsometric curve (HC) and hypsometric integral (HI)	352
6. Results and discussion	355
6.1 Analysis of morphometric parameters	355
6.2 Linear parameters	356
6.3 Relief parameters	359
6.4 Aerial parameters	361
6.5 Analysis of morphotectonic parameters	363
7. Hypsometric curve (HC) and hypsometric integral (HI)	364
8. Prioritisation of mini-watersheds/sub-basins and soil erosion hotspots	366
9. Summary and conclusions	370
References	370

18. Development of android application for visualisation of soil water demand

Prashant K. Srivastava, Prachi Singh, Varsha Pandey and Manika Gupta

1. Introduction	375
2. Materials and methods	377
2.1 Test site	377
2.2 Soil sampling and generation of soil texture of Varanasi	378
2.3 Soil moisture deficit (SMD) computation	378
2.4 Development of android application for irrigation scheduling	380
3. Conclusion	384
Acknowledgement	387
References	387

19. GIS-based analysis for soil moisture estimation via kriging with external drift

Akash Anand, Prachi Singh, Prashant K. Srivastava and Manika Gupta

1. Introduction	391
2. Study area	393
3. Materials and methods	394
3.1 Kriging	394
3.2 Semi-variogram	395

3.3	Kriging with external drift (KED)	396
3.4	Geostatistical parameters	397
3.5	Hydra probe	398
4.	Result and discussions	398
4.1	Interpolated soil moisture and soil temperature	398
5.	Conclusion	405
	References	405

20. Modelling key parameters characterising land surface using the SimSphere SVAT model

Swati Suman, Matthew R. North, George P. Petropoulos, Prashant K. Srivastava, Dionissios T. Hristopulos, Daniela Silva Fuzzo and Toby N. Carlson

1.	Introduction	409
2.	Model formulation	411
3.	Materials and methods	414
3.1	In-situ datasets collection	416
3.2	SimSphere parameterisation and implementation	419
3.3	Validation	419
4.	Results	420
4.1	Net radiation (R_{net}) flux	420
4.2	Latent Heat (LE) flux	428
4.3	Sensible Heat (H) flux	433
5.	Discussion	433
6.	Concluding remarks	439
	Acknowledgements	440
	References	440

Part VI

Future challenges in agricultural water management

21. Future challenges in agricultural water management

Sumit Kumar Chaudhary and Prashant K. Srivastava

1.	Introduction	445
2.	Future challenges	447
2.1	Irrigation scheduling	447
2.2	Irrigation water need	448
2.3	Farmers knowledge limitation	449
2.4	Policy adaptation, integration and coherence between agriculture, water, energy and environmental policies	450
3.	Conclusion	451
	References	452
