Introduction	xvii
1 Setting innovation free in agriculture	1
<i>Rupert Sheldrake</i>	
1.1 Introduction	1
1.2 The scientific priesthood	2
1.3 The fantasy of omniscience	5
1.4 The credibility crunch for materialism	7
1.5 The unfulfilled promises of molecular biology	10
1.6 Toward a more holistic approach	13
1.7 Setting innovation free	25
References	26
2 Agriculture planted the seeds of alienation from nature	31
<i>Jim Mason and Laila Kassam</i>	
2.1 Introduction	31
2.2 Dominionism: Our nature-dominating worldview and its origins	31
2.3 Before agriculture: A world alive and ensouled	33
2.4 Other animals: Movers and shakers of the human mind and worldview	35
2.5 Agriculture: A new relationship with nature, a new social order	37
2.6 Misothery: The reduction of animals and nature	39
2.7 Herders' legacies: The making of the Western worldview	41
2.8 War and colonialism: Dominating lands and others	44
2.9 The herder roots of property, money, and capitalism	45
2.10 Consequences of dominionism and misothery	46
2.11 Conclusion	48
References	49
3 Political economy of the global food and agriculture system	53
<i>Philip McMichael</i>	
3.1 Introduction	53
3.2 Antecedents of the present crisis	53
3.3 Political economy of the food regime	55
3.4 Food regime complexes	57

3.5	Food system transitions	64
3.6	Crisis and resolution	66
	Acknowledgments	70
	References	70
4	Neocolonialism and the New Alliance for Food Security and Nutrition: A gendered analysis of the development consequences for Africa	77
	<i>Mark Langan and Sophia Price</i>	
4.1	Introduction	77
4.2	Neocolonialism as a critique of donor aid policies in the Global South	78
4.3	The NAFSN: Sustainable development or a form of “neocolonial” imposition?	80
4.4	A gendered lens on “development”: The impact of the neocolonial NAFSN for women in Africa	85
4.5	Conclusion	89
