

Preface	vii
Editors	ix
Contributors	xiii
List of Abbreviations	xvii

1. Introduction of Fermentation and Enzyme Science	1
<i>Monika Choudhary, Sunanda Joshi and Nidhi Srivastava</i>	
2. α-Amylases: An Overview on Molecular Structure and Biotechnological Perspectives	13
<i>Saptadip Samanta</i>	
3. Study of α-Amylase Based on their Compositional Parameters of Its Gene Along with Its Protein Structure	41
<i>Sunil Kanti Mondal, Satadruta Das and Madhab Kumar Sen</i>	
4. Microbial Enzymes in Food Industry: Types and Applications	61
<i>G. Singhal, S.S. Bhagyawant and Nidhi Srivastava</i>	
5. Fermented Foods for Health: Processes and Prospects	73
<i>Sudip Some and Amit Kumar Mandal</i>	
6. Advances in Enzymatic Applications in Food Industry	85
<i>Kashif Ameer, Protiva Rani Das and Jong-Bang Eun</i>	
7. Role of Enzymes in Development of Functional Foods and Food Products	99
<i>Protiva Rani Das, Kashif Ameer and Jong-Bang Eun</i>	
8. Application of Immobilized Cells and Enzymes in the Food Industry	115
<i>Judit Krisch, Erika Beáta Kerekes, Miklós Takó and Csaba Vágvolgyi</i>	
9. Dextranucrase: A Microbial Enzyme with Wide Industrial Applications	129
<i>Jagan Mohan Rao Tingirikari and Shadab Ahmed</i>	
10. Trends in Biosensors and Role of Enzymes as Their Sensing Element for Healthcare Applications	147
<i>Tathagata Adhikary, Amalesh Nanda, K. Thangapandi, Shantonu Roy and Saikat Kumar Jana</i>	

11. Application of Bile Salt Hydrolase Enzyme in Cholesterol Lowering	165
<i>Kriti Ghatani</i>	
12. Fermentative and Enzyme-Assisted Production of Phenolic Antioxidants from Plant Residues	175
<i>Miklós Takó, Carolina Zambrano, Alexandra Kotogán, Erika Beáta Kerekes, Tamás Papp, Judit Krisch and Csaba Vágvölgyi</i>	
13. Relevance of Microbial Enzymes in Textile Industries Emphasizing Metabolic Engineering Panorama.....	195
<i>Dipankar Ghosh and Priyanka Talukdar</i>	
14. Microbial Degradation of Organophosphate Pesticides: A Review	207
<i>Sangeeta Raut</i>	
15. Microbial Production of Xylitol: A Cost-Effective Approach.....	227
<i>Yogita Lugani, Balwinder Singh Sood, Vinita Dheeran and Sachin Kumar</i>	
16. Enzymes: Key Role in the Conversion of Waste to Bioethanol.....	257
<i>Abhijeet Thakur, Kedar Sharma, Kaustubh C. Khaire, Vijay S. Moholkar and Arun Goyal</i>	
17. Microbial Laccase: A Vanguard Biocatalyst and Its Potentiality towards Industrial Applications	269
<i>Priyanka Ghosh and Uma Ghosh</i>	
18. Biofuel Cellulases: Diversity, Distribution and Industrial Outlook.....	283
<i>Lavika Jain and Deepti Agrawal</i>	
19. Enzymatic Hydrolysis of Lignocellulosic Biomass Using Engineered Microorganisms and <i>In Silico</i> Approaches for Enhanced Enzyme Production: A Review	299
<i>Manish Paul, Sonali Mohapatra and Hrudayanath Thatoi</i>	
20. Agrowaste to Ethanol: Orchestrated by Enzymes from Microbes	319
<i>Modhurima Chakraborti and Krishnendu Acharya</i>	
Index.....	335
