

Part I Hydrogeology and Aquifer Contamination

- 1 Geological and Hydrogeological Characterization of Springs in a DSGSD Context (Rodoretto Valley – NW Italian Alps) 3**
Martina Gizzi, Stefano Lo Russo, Maria Gabriella Forno,
Elena Cerino Abdin, and Glenda Taddia
- 2 Evaluation and Prediction of Seepage Discharge Through Tailings Dams When Their Height Increases 21**
Viacheslav V. Fetisov and Elena A. Menshikova
- 3 Sediment Yield in Mountain Basins, Analysis, and Management: The SMART-SED Project 43**
Davide Brambilla, Monica Papini, Vladislav Ivov Ivanov,
Luca Bonaventura, Andrea Abbate, and Laura Longoni
- 4 Natural Groundwater Background Levels of Nitrate and Landfill Effects (Apulia, Southern Italy) 61**
Livia Emanuela Zuffianò, Pier Paolo Limoni, Giorgio De Giorgio,
and Maurizio Polemio

Part II Geology and Urban Areas

- 5 Sinkholes in the Friuli Venezia Giulia Region Focus on the Evaporites 73**
Chiara Calligaris, Luca Zini, Stefania Nisio, and Chiara Piano
- 6 Collapses in Calcarenitic Deposits Along the Sides of the Ginosa Ravine in South Italy 91**
Angelo Doglioni and Vincenzo Simeone

7	Relation Between On-Field and InSAR Data on Landslide-Induced Damage	107
	Matteo Del Soldato, Silvia Bianchini, Pantaleone De Vita, Diego Di Martire, Roberto Tomás, Domenico Calcaterra, and Nicola Casagli	
8	A Hierarchical Model for the Rocca di Sciarra Northeastern Slope Instabilities (Sicily, Italy)	131
	Mario Valiante, Francesca Bozzano, Marta Della Seta, and Domenico Guida	

Part III Geomechanics

9	Comparing Direct and Indirect Methods to Estimate Uniaxial Compressive Strength of Rocks Belonging to the Dolomites Sequence (NE Italian Alps)	147
	Elia Longo, Ennio Chiesurin, and Mario Floris	
10	CO₂ Sequestration and Enhanced Coalbed Methane Recovery: Worldwide Status and Indian Scenario	161
	Bankim Mahanta and Vikram Vishal	

Part IV Landslide: Monitoring

11	Hydrological Behavior of Unsaturated Shallow Soils on a Slope and Its Failure Mechanism: A Case Study in Ren River Catchment, China	185
	Xinsheng Wei, Wen Fan, Massimiliano Bordoni, and Claudia Meisina	
12	First Steps for the Development of an Optical Fibre Strain Sensor for Shallow Landslide Stability Monitoring Through Laboratory Experiments	197
	Monica Papini, Vladislav Ivov Ivanov, Davide Brambilla, Maddalena Ferrario, Marco Brunero, Gabriele Cazzulani, and Laura Longoni	
13	The Giant Seymareh Landslide (Zagros Mts., Iran): A Lesson for Evaluating Multi-temporal Hazard Scenarios	209
	Michele Delchiaro, Javad Rouhi, Marta Della Seta, Salvatore Martino, Reza Nozaem, and Maryam Dehbozorgi	
14	Toward Real-time Geodetic Monitoring of Landslides with GNSS Mass-market Devices	227
	Paolo Dabove, Ambrogio M. Manzino, Alberto Cina, Marco Piras, and Iosif H. Bendea	

Part V Landslide: Climate Change

- 15 Advances in Rainfall Thresholds for Landslide Triggering in Italy 247**
Stefano Luigi Gariano, Samuele Segoni, and Luca Piciullo
- 16 Validation of a Shallow Landslide Susceptibility Analysis Through a Real Case Study: An Example of Application in Rome (Italy) 265**
Geraud Poueme Djueyep, Carlo Esposito, Luca Schilirò, and Francesca Bozzano

Part VI Landslide: Control

- 17 Application of a Generalized Criterion: Time-of-Failure Forecast and Alert Thresholds Assessment for Landslides 283**
Alessandro Valletta, Andrea Segalini, and Andrea Carri
- 18 Evaluation of prediction capability of the MaxEnt and Frequency Ratio methods for landslide susceptibility in the Vernazza catchment (Cinque Terre, Italy) 299**
Emanuele Raso, Diego Di Martire, Andrea Cevasco, Domenico Calcaterra, Patrizio Scarpellini, and Marco Firpo
