Preface, xiii

List of Contributors, xv

Dedication, xxi

PART I FORAGE PLANTS, 1

1 Perspectives, Terminology, and Classification, 3

C. Jerry Nelson, Professor Emeritus, Kenneth J. Moore, Distinguished Professor, Michael Collins, Professor Emeritus and Daren D. Redfearn, Associate Professor

2 Grass Morphology, 23

C. Jerry Nelson, Professor Emeritus and Kenneth J. Moore, Distinguished Professor

3 Legume Structure and Morphology, 51

John Jennings, Professor and Jamie Foster, Professor

4 Carbon Metabolism in Forage Plants, 65

Jeffrey J. Volenec, Professor and C. Jerry Nelson, Professor Emeritus

5 Mineral Nutrient Acquisition and Metabolism, 85

Sylvie M. Brouder, Wickersham Chair and Professor and Jeffrey J. Volenec, Professor

6 Plant-Water Relations in Forage Crops, 113

Jennifer W. MacAdam, Professor and C. Jerry Nelson, Professor Emeritus

7 Growth and Development, 127

Robert B. Mitchell, Research Agronomist, Daren D. Redfearn, Associate Professor and Kenneth J. Moore, Distinguished Professor

PART II FORAGE ECOLOGY, 149

8 Climate, Climate-Change and Forage Adaptation, 151

Vern S. Baron, Research Scientist and Gilles Bélanger, Research Scientist

- 9 **Plant Interactions, 187**
John A. Guretzky, Grassland Systems Ecologist
- 10 **Plant-Herbivore Interactions, 201**
Lynn E. Sollenberger, Distinguished Professor and Marcelo O. Wallau, Associate Professor
- 11 **Nutrient Cycling in Forage Production Systems, 215**
David A. Wedin, Professor and Michael P. Russelle, Soil Scientist (Retired)
- 12 **Forages for Conservation and Improved Soil Quality, 227**
John F. Obrycki, ORISE Fellow and Douglas L. Karlen, Soil Scientist (Retired)
- 13 **Forages and the Environment, 249**
Matt A. Sanderson, Research Agronomist and Research Leader (Retired) and Mark A. Liebig, Soil Scientist

PART III FORAGE SPECIES, 261

- 14 **Cool-Season Legumes for Humid Areas, 263**
Craig C. Sheaffer, Professor, Gerald W. Evers, Professor Emeritus and Jacob M. Jungers, Associate Professor
- 15 **Legumes for Tropical and Subtropical Areas, 277**
William D. Pitman, Professor and João M.B. Vendramini, Associate Professor
- 16 **Cool-Season Grasses for Humid Areas, 297**
Michael D. Casler, Research Geneticist, Robert L. Kallenbach, Associate Dean and Geoffrey E. Brink, Research Agronomist
- 17 **Grasses for Arid and Semiarid Areas, 313**
Daren D. Redfearn, Associate Professor, Keith R. Harmony, Range Scientist and Alexander J. Smart, Professor and Rangeland Management Specialist
- 18 **Warm-Season Grasses for Humid Areas, 331**
Lynn E. Sollenberger, Distinguished Professor, João M.B. Vendramini, Associate Professor, Carlos G.S. Pedreira, Associate Professor and Esteban F. Ríos
- 19 **Forbs and Browse Species, 347**
David P. Belesky, Clinical Associate & Director, John W. Walker, Professor and Resident Director, Kimberly A. Cassida, Forage Extension Specialist and James P. Muir, Professor

PART IV FORAGE SYSTEMS, 367

- 20 **Systems for Temperate Humid Areas, 369**
Jerome H. Cherney, Professor, Robert L. Kallenbach, Associate Dean and Valentin D. Picasso Riso, Assistant Professor
- 21 **Forage Systems for the Temperate Subhumid and Semiarid Areas, 387**
John R. Hendrickson, Research Rangeland Management Specialist and Corey Moffet, Research Rangeland Management Specialist
- 22 **Systems for the Warm Humid Areas, 407**
William D. Pitman, Professor and Montgomery W. Alison, Extension Forage Specialist
- 23 **Systems for Humid Transition Areas, 419**
Renata N. Oakes, Assistant Professor and Dennis W. Hancock, Center Director

24 Forage Systems for Arid Areas, 433

Daniel H. Putnam, Forage Extension Specialist and Tim DelCurto, Professor and Nancy Cameron Chair

PART V FORAGE PRODUCTION AND MANAGEMENT, 453**25 Forage Establishment and Renovation, 455**

Marvin H. Hall, Professor, Yoana C. Newman, Associate Professor and Jessica A. Williamson, Assistant Professor

26 Fertilization and Nutrient Management, 473

David J. Barker, Professor and Steven W. Culman, Professor

27 Irrigation and Water Management, 497

L. Niel Allen, Associate Professor and Irrigation Specialist and Jennifer W. MacAdam, Professor of Plants, Soils and Climate

28 Weed Management, 515

Robert A. Masters, Rangeland Scientist (Retired), Byron B. Sleugh, Forage Agronomist and E. Scott Flynn, Forage Agronomist

29 Insect Management, 535

R. Mark Sulc, Professor, William O. Lamp, Professor and G. David Buntin, Professor

PART VI FORAGE IMPROVEMENT, 551**30 Forage Breeding, 553**

Michael D. Casler, Research Geneticist and Kenneth P. Vogel, Research Geneticist (retired)

31 Biotechnology and Molecular Approaches to Forage Improvement, 567

E. Charles Brummer, Professor and Zeng-Yu Wang, Professor

32 Seed Production, 581

Jeffrey J. Steiner, Associate Director and Tim L. Springer, Research Agronomist

PART VII FORAGE QUALITY, 593**33 Carbohydrate and Protein Nutritional Chemistry of Forages, 595**

Ronald D. Hatfield, Research Plant Physiologist and Kenneth F. Kalscheur, Research Dairy Scientist

34 Digestibility and Intake, 609

David R. Mertens, President and Research Dairy Scientist (Retired) and Richard J. Grant, President and Research Scientist

35 Plant Chemistry and Antiquality Components in Forage, 633

Nicholas S. Hill, Professor and Craig A. Roberts, Professor

36 Laboratory Methods for Evaluating Forage Quality, 659

William P. Weiss, Professor and Mary Beth Hall, Research Animal Scientist

37 Animal Methods for Evaluating Forage Quality, 673

Eric S. Vanzant, Associate Professor, Robert C. Cochran, Professor and Wayne K. Coblenz, Research Dairy Scientist/Agronomist

38 Predicting Forage Quality, 687*Debbie J. Cherney, Professor and David Parsons, Professor***39 Factors Affecting Forage Quality, 701***Kenneth J. Moore, Charles F. Curtiss, Distinguished Professor, Andrew W. Lenssen, Professor and Steven L. Fales, Emeritus Professor***PART VIII FORAGE HARVESTING AND UTILIZATION, 719****40 Post-Harvest Physiology, 721***Wayne K. Coblenz, Research Dairy Scientist/Agronomist***41 Hay Harvest and Storage, 749***C. Alan Rotz, Agricultural Engineer, Kevin J. Shinnars, Professor and Matthew Digman, Assistant Professor***42 Silage Production, 767***Richard E. Muck, Agricultural Engineer, Limin Kung Jr., Professor and Michael Collins, Professor and Director Emeritus***43 Biomass, Energy, and Industrial Uses of Forages, 789***Matt A. Sanderson, Research Agronomist and Research Leader (Retired), Paul Adler, Research Agronomist and Neal P. Martin, Director (Retired)***PART IX PASTURE MANAGEMENT, 801****44 Pasture Design and Grazing Management, 803***Lynn E. Sollenberger, Distinguished Professor, Yoana C. Newman, Associate Professor and Bisoonat Macoon, Research Professor***45 Grazing Animal Nutrition, 815***Gregory Lardy, Department Head and Richard Waterman, Research Animal Scientist***46 Grazing Animal Behavior, 827***Karen L. Launchbaugh, Head Professor***47 Forage-Induced Animal Disorders, 839***Tim A. McAllister, Principal Research Scientist, Gabriel Ribeiro, Assistant Professor, Kim Stanford, Research Scientist and Yuxi Wang, Research Scientist***48 Grazing Systems and Strategies, 861***Michael Collins, Professor and Director Emeritus, Kenneth J. Moore, Distinguished Professor, C. Jerry Nelson, Professor Emeritus and Daren D. Redfearn, Associate Professor***Common and Scientific Names of Forages, 883****Glossary, 893****Index, 919**
