

Contents

Preface	vii
Contributors	ix
1. Assessing Environmental Impact of Pollen-Mediated Transgene Flow <i>Bao-Rong Lu</i>	1
2. Indirect Methods for Monitoring and Modeling Gene Flow in Natural Plant Populations <i>María Eugenia Barrandeguy and María Victoria García</i>	26
3. Challenges for Monitoring (Trans)Gene-flow in the Environment <i>Sarah Zanon Agapito-Tenfen and Fern Wickson</i>	39
4. Transgenic Poplar Gene Flow Monitoring in China <i>Lei Zhang and Jian-Jun Hu</i>	56
5. Monitoring Gene Flow from Genetically Modified Soybean to Cultivated Soybean and Wild Soybean in China <i>Lai-Pan Liu, Kun Xue and Biao Liu</i>	71
6. Monitoring Herbicide Resistance Gene Flow in Weed Populations <i>Hugh J. Beckie and Sara L. Martin</i>	86
7. Modeling Gene Flow from Genetically Modified Plants <i>Wei Wei, Jun-Ming Wang, Xiang-Cheng Mi, Yan-Da Li and Yan-Ming Zhu</i>	103
8. Controlling Transgene Flow from Engineered Crops to Unintended Hosts by Molecular Approaches <i>C. Neal Stewart, Jr</i>	118
9. Gene Flow Mitigation by Ecological Approaches <i>Yong-Bo Liu and Xin-Yu Wang</i>	125
10. Containment Strategies for Synthetic Gene Drive Organisms and Impacts on Gene Flow <i>Lei Pei and Markus Schmidt</i>	137
Index	153
