

1

Understanding landscape and visualisation

- | | | | |
|----|---|----|---|
| 14 | Introduction to terminology: Basics, principles, and preclusions | 22 | Being outdoors: Sensations and universal experiences |
| 16 | The profession, its distinction from architecture and why this matters to perspective visualisation | 24 | The role of the viewer: Perceiving the medium of landscape |
| 17 | Landscape, imagery, and the profession | 26 | Influential imagery: The landscape-image-landscape cycle, and its role in fostering value and meaning |
| 19 | Transmitting the message: The landscape as medium for ideas | 27 | Final points |
| 20 | The difference in design and visualisation: Changeable, ephemeral contents of landscape | | |

2

Understanding linear perspective

- | | | | |
|----|---|----|--|
| 32 | Basic characteristics and composition | 49 | Types of linear perspective: Construction and effects |
| 34 | The perspective view: Definition and terminology | | One-point perspective |
| 37 | Origins and history: From Ancient Greece to the Renaissance | 50 | Two-point perspective |
| 38 | The discovery of perspective construction | 51 | Viewer location and elevation |
| 40 | Atmospheric perspective views | 52 | Pedestrian eye level |
| 44 | A review of general observations | 55 | Human figures and embellishment: Storytelling |
| 45 | The importance of the picture plane and the effects of convergence | 56 | Artistic possibilities: Graphic style, colour, and media |
| 48 | Usefulness and limitations of perspectives: Perceptibility over precision | 59 | Composition variables and placement of vanishing points |
| | | 64 | Criteria for success |

3

The perspective leap into landscape visualisation

- | | | | |
|----|---|----|---|
| 70 | Pictorial developments and literary influences | 80 | Visualisation: The perspective and its early influence on architectural and garden design |
| 71 | From painting to landscape: Seeing landscape space as restorative place | | Combining the imaginary with the factual |
| 72 | The Arcadian ideal and its influences on the garden | 81 | The perspective visualisation at Villa Lante in Bagnaia |
| 75 | Origins in painting: The framed view from indoors / background landscapes in Italy and Flanders | 83 | Villa Lante: Construction and manipulation |
| 76 | Other applications of perspective and landscape in Europe | 84 | Landscape design from Renaissance Arcadia onwards |
| 78 | Symbolic and fantasy landscape: The view from outdoors | | |

4

Perspective developments in the 17th and 18th centuries

- | | |
|---|---|
| 88 Visualising the formal garden and landscape garden | 101 The 18th century ideal landscape: Pastoral Arcadia |
| 89 The 17th century: Linear perspectives and the formal French garden | 102 Claude's influence on the English countryside |
| 92 Visualisation for persuasion and publicity
Standardised visualisation before construction | 103 The perspective in 18th century landscape visualisation: Picturesque vision |
| 94 Prestige and power: Visualisation after construction | 104 Visualising the picturesque landscape |
| 96 The 17th century and new artistic influences | 105 William Kent |
| 97 New observation and appreciation of landscape | 106 Capability Brown |
| 98 Lorrain and the perfected landscape composition | 107 Repton and the composite perspective: Fusing the imaginary with the real |
| | 110 The reciprocal relationship: Nature imitates art, art imitates nature |
| | 111 Concluding statements and summary of events |

5

Visualising a social Arcadia: 1850s to early 1900s

- | | |
|--|--|
| 118 Visualising a social Arcadia: Public landscapes from the 1850s to the early 1900s
The need for a new public green space | 125 Education in urban design and planning: The Beaux Arts schools |
| 119 Beginnings in England | 127 Urban expansion and the competition for Central Park |
| 120 Visualising public parks in England | 132 After Central Park: Visualising the landscape at the beginning of the 20th century |
| 122 Competition culture | 134 Summary of 19th century: Public design and the professionalisation of landscape design |
| 123 The influence of education on perspective visualisation | |

6

The first decades of the 20th century

- | | |
|--|---|
| 140 The first decades of the 20th century
Contextual background for garden and landscape design before World War II | 150 The Vera brothers' perspective visualisations |
| 141 New influences: Photography, media, and art
The impact of print media and competitions | 152 Other gardens of the 1920s across Europe |
| 142 Events in art: Abstract and decorative influences on gardens and landscapes | 154 The 1920s: Neues Bauen, public parks, and landscapes in Germany |
| 144 Garden visualisations in the first decades of the 20th century: Germany and France | 155 The Bauhaus and landscape architecture |
| 146 The return to the geometric garden in early 20th century France
Henri and Achille Duchêne | 156 Landscape visualisation in the public realm: Leberecht Migge's ideas for social improvement |
| 148 J.C.N. Forestier: Planting emphasis within perspective scenes | 158 Erwin Barth |
| 150 Cubism and the influence of new art on landscape design | 159 Le Corbusier: Landscape versus architecture |
| | 161 Garrett Eckbo and Roberto Burle Marx: Modernist black-line perspective |
| | 162 Perspectives for large-scale projects |
| | 163 Roberto Burle Marx |
| | 164 Summary of developments |

7

The second half of the 20th century

- | | |
|--|--|
| 170 Subjective expression | 177 Competition culture |
| 171 Landscape architectural design in the modernist and post-modernist period | 178 Art and technology in turn-of-the-century visualisation: The emergence of the collage |
| 172 A changing profession: Urban expansion and new fields of work in the 1950s and 60s | 179 Digital collaging
From modernist austerity to expressive perspective visualisations |
| 173 Visualising for corporate clients:
New projects | 180 Subjectivism and uniqueness in landscape architectural visualisation |
| 174 The stronghold of modernist graphics:
Halprin and Noguchi | 182 Dieter Kienast |
| 176 Landscape architectural education:
Producing the landscape designer-engineer-artist | 184 New viewpoints: Dutch landscape visualisation |
| | 186 Summary of 20th century subjective landscapes |

8

21st century perspective visualisation: The return of Arcadian themes

- | | |
|--|--|
| 192 21st century Arcadia and the hyper-realistic picturesque | 206 The return of beauty and awe in 21st century Claudian pictorial composition |
| 193 New ideas and the return to pictorial vision | 207 Enduring themes of Beauty and Sublime |
| 194 The digital turn in the landscape profession | 209 The return of the Sublime: Wonder and awe in artificial and natural contexts |
| 196 Digital models in landscape visualisation:
The difficulty of representing vegetation in CAD | 212 The return of an Arcadian vision: The ideal society |
| 197 Digitalisation of the landscape | 214 Summary of events and final thoughts |
| 201 The impact of digital media on visualisation
Persuading the viewer: Storytelling through digital perspectives | 218 Concluding remarks |
| 204 The picturesque composition as evolutionary preference | 220 Future creativity and artful expression |
-

9

Constructing perspectives

- 226 Perspective views: Seeing and understanding space
- 228 Linear perspectives: Basic observations, principles, and assumptions
- 229 Basic assumptions
- 230 Observations and principles
- 232 The horizon line
- 234 Basic set-up for linear perspective
- 236 Types of linear perspective
- 238 Atmospheric or size perspective
- 242 Extending the visual fields
- 246 Dimensioned space and depth illusion
- 247 Cone of vision
- 248 Constructing a perspective grid
- 249 Diagonal point method for determining depth
- 250 The horizon line and its effect on the perspective
- 252 Stairs, ramps, and slopes
- 253 Reflections in perspectives
- 254 Repetitive elements in perspective
- 256 Drawing circles in perspective
- 257 Constructing simple shadows
- 258 Perspective plan method: One-point perspective
- 260 Perspective plan method: Projecting a two-point perspective
- 262 Drawing perspectives with a prepared perspective grid
- 264 Using a perspective grid
- 266 Using a prepared perspective grid
- 268 Drawing perspectives using photographs
- 270 Freehand perspective drawings on site
- 272 Estimating proportions when freehand drawing
- 274 Freehand one-point perspective
- 276 Freehand two-point perspective
- 278 Rendering and graphic styles
- 280 Composition: Key elements and devices
- 281 Framing
- 282 Framing using architecture and built structures
- 284 Balance
- 286 Contrasts, light, and atmosphere
- 287 Horizontal proportions: Sky and ground plane
- 288 Human figures and activities
- 290 Composition: Final comments
