

Contents

1	Integrated Waste Biorefinery for Biofuels and Biochemicals	1
	Kalyanasundaram GeethaThanuja, Desikan Ramesh, Muniraj Iniyakumar, Suchitra Rakesh, Karimangalam Murugesan Shivakumar, and Subburamu Karthikeyan	
2	Progress in Consolidated Bioprocessing of Lignocellulosic Biomass for Biofuels and Biochemicals	35
	Tanvi Govil, Adhithya S. Narayanan, David R. Salem, and Rajesh K Sani	
3	Next Generation Biofuels from Macroalgae: Prospects and Challenges	55
	Shraddha Shukla, Rishikesh Shukla, Neha Singh, Hemansi, and Jitendra Kumar Saini	
4	Co-Digestion of Lignocellulosic Wastes with Food Waste for Sustainable Biogas Production	77
	Ankur Choudhary, Ashish Kumar, and Sudhir Kumar	
5	Current Status and Prospects of Biohydrogen Production Process	99
	Chandan Mahata and Debabrata Das	
6	Biorefining of Lignin Wastes: Modularized Production of Value-Added Compounds	135
	Tanvi Govil, Magan Vaughn, David R. Salem, and Rajesh K Sani	
7	Understanding the Potential Applications of Biofilms as Industrial “Cell Factories”	165
	Tanvi Govil, Saveena Solanki, Zachary Hogan, Sudhir Kumar, David R. Salem, and Rajesh K Sani	

8	Nanotechnological Interventions for Sustainable Production of Microbial Biofuel and Bioenergy	191
	A. P. Ingle, F. A. F. Antunes, A. V. Paula, D. L. Flumignan, R. Terán-Hilares, R. R. Philippini, S. E. Martiniano, P. Abdeslahian, A. Hernandez-Perez, G. M. M. Silva, S. Sánchez-Muñoz, T. M. Rocha, D. R. Ribeaux, E. M. D. Oliveira, J. C. Santos, and S. S. da Silva	
9	Role of Metabolic Engineering and Synthetic Biology in the Development of Microbes for Biofuel Production	227
	Raubins Kumar, Anju Mayadevi Nair, and Syed Shams Yazdani	
10	Microbial Biotechnology for Renewable and Sustainable Energy: The Current Status of Biogas, Biodiesel, and Bioethanol in Brazil	255
	F. A. F. Antunes, A. P. Ingle, T. M. Rocha, A. Hernandez-Perez, R. R. Philippini, S. E. Martiniano, S. Sánchez-Muñoz, C. A. Pradro, A. V. Paula, D. L. Flumignan, L. K. Santos, D. D. V. Silva, K. J. Dussán, J. C. Santos, and S. S. da Silva	
11	Enzymatic Saccharification Technologies for Biofuel Production: Challenges and Prospects	297
	Priyadharshini Ramachandran, J. Beslin Joshi, Lakshmi Kasirajan, Julie A. Maupin-Furlow, and Sivakumar Uthandi	
12	New Trends and Commercial Aspects of Enzymatic Saccharification of Lignocellulosic Biomass	321
	Nathiely Ramírez-Guzmán, Erick M. Peña-Lucio, Orlando de la Rosa, Jorge Angulo-López, Salvador Saldaña-Mendoza, Sandra Pacios, Leidy Johana Valencia-Hernández, Laihsa Rodriguez, and Cristóbal N. Aguilar	
13	Yeasts for Single Cell Oil Production from Non-conventional Bioresources	337
	Sagia Sajish, Surender Singh, and Lata Nain	
14	Techno-economic and Life Cycle Assessments of Microbial Process in Renewable Energy Production	365
	Na Wu, Shunchang Yang, Pratap Pullammanappallil, and Ghasideh Pourhashem
