

Contents

1	Process of Plant Breeding	1
1.1	Plants for Human Benefit	1
1.2	Plant Domestication and Movement	2
1.3	Plant Hybridization and Mendelian Inheritance	5
1.4	Overview of the Breeding Process	7
1.4.1	Breeding Objectives	7
1.4.2	Assembling Genetic Variation	12
1.4.3	Developing and Selecting Progeny	13
1.4.4	Disseminating New and Improved Cultivars	15
1.5	Genetic Resources and Prebreeding	17
1.6	Breeding Organizations	19
1.7	Summary	22
2	Genetic Basis of Plant Improvement	23
2.1	Mendelian Inheritance	23
2.1.1	Genes, Chromosomes, and Gametes	23
2.1.2	Monohybrid and Dihybrid Ratios	26
2.1.3	Progeny Tests and Determining Parental Genotypes	29
2.2	Dominance and Epistasis	30
2.3	Linkage	32
2.4	Molecular Markers	36
2.5	Changes in Chromosome Number	38
2.5.1	Polyploidy and Chromosome Pairing	38
2.5.2	Autopolyploids and Allopolyploids	39

2.5.3	Induced Polyploidy	42
2.6	Quantitative Inheritance	43
2.7	Genotypic and Phenotypic Values	48
2.7.1	$P = G + E$	48
2.7.2	Breeding Values	50
2.8	Genetic Variances	51
2.9	Heritability	54
2.10	Transgenic Plants	56
2.10.1	Genetic Code, Transcription, and Translation	56
2.10.2	Gene Constructs and Plant Transformation	60
2.10.3	Adoption of Transgenic Cultivars	63
2.11	Genome Editing via CRISPR-Cas9	65
2.12	Summary	68
3	Modes of Reproduction and Types of Cultivars	69
3. 1	Modes of Plant Reproduction	69
3.1.1	Self-Pollinated, Cross-Pollinated, and Asexually Propagated Species	69
3.1.2	Male Sterility and Incompatibility	72
3.2	Genetic Consequences of Selfing	74
3.3	Inbreeding Depression	77
3.4	Genetic Consequences of Crossing	78
3.5	Heterosis	81
3.6	Types of Cultivars	82
3.7	Types of Families	87
3.8	Pollination Techniques	89
3.9	Summary	91
4	Phenotyping	93
4.1	Obtaining Good Phenotypic Data	93
4.1.1	Genetic and Nongenetic Effects in a Trial	93
4.1.2	Experimental Designs	95
4.1.3	Hypothesis Tests	97
4.2	Genotype $\times$ Environment Interaction	99
4.3	Abiotic Stresses	103
4.3.1	Mechanisms of Resistance to Abiotic Stresses	103
4.3.2	Screening Procedures	104
4.4	Biotic Stresses	105
4.4.1	Host-Plant Resistance	105
4.4.2	Mechanisms of Resistance to Biotic Stresses	107
4.4.3	Screening Procedures	108
4.5	Subjectivity in Phenotyping	109
4. 6	Advanced Technologies and Phenomics	110
4.7	Selection for Multiple Traits	113
4.8	Summary	116

5	Line Development and Clonal Selection	117
5.1	Pureline Selection in Landraces	117
5.2	Parental Selection in Self-Pollinated Plants	119
5.2.1	High Mean and Large Genetic Variance	119
5.2.2	Crossing “Good by Good”	121
5.2.3	Diversity and Complementation between Parents	123
5.2.4	Number versus Size of Populations	125
5.3	Response to Selection	126
5.4	Clonal Selection in Asexually Propagated Plants	128
5.5	Bulk Method and Mass Selection	130
5.6	Single-Seed Descent	134
5.7	Early Generation Testing	136
5.8	Pedigree Selection	137
5.9	Doubled Haploids	140
5.10	Summary	143
6	Hybrid Development and Population Improvement	145
6.1	Two Parents and a Tester	145
6.2	Heterotic Groups and Patterns	148
6.3	Parental Selection in Hybrid Breeding	149
6.4	General and Specific Combining Ability	150
6.5	Synthetic Cultivars	153
6.6	Recurrent Selection	155
6.6.1	Rationale for Recurrent Selection	155
6.6.2	Intrapopulation Selection	159
6.6.3	Interpopulation Selection	165
6.6.4	Increasing the Response to Selection	169
6.7	Long-Term Selection	170
6.8	Summary	173
7	Breeding with Major Genes and Molecular Markers	175
7.1	Selection with Major Genes and QTL	175
7.2	Linkage Mapping of Major Genes or QTL	179
7.2.1	Major Genes	179
7.2.2	Major QTL	180
7.3	Association Mapping	183
7.4	Backcrossing	186
7.4.1	Phenotypic Backcrossing	186
7.4.2	Marker-Assisted Backcrossing	189
7.5	F_2 Enrichment	192
7.6	Genomewide Selection	194
7.6.1	Marker-Based Selection without QTL Mapping	194
7.6.2	Training, Validation, and Test Populations	196
7.6.3	Application	197
7.7	Summary	200

8 Breeding Programs	203
8.1 Breeding for Different Categories of Crops	203
8.2 Sample Breeding Programs: Soybean, Maize, and Apple . .	207
8.3 Variety Protection and Intellectual Property Rights	212
8.4 Plant Breeding as a Career	214
8.5 Summary	217
