Preface.....xi

Acknowledgments..... xiii

Chapter 1 Introduction: Before 1900 1

 Aspects of Animal Ecology3

 A. Physiological Animal Ecology3

 B. Ethology6

 C. Animal Population Ecology.....8

 1954 10

 1957–58..... 11

 Since 1958 12

 Fisheries After 1960 12

 Wildlife After 1960 13

 D. Saving Habitats and Managing Wildlife..... 13

 Historical Record of Extinctions..... 13

 United States Policy 14

 Saving Habitats and Some Mammals 14

 Wildlife Management..... 16

 Biogeography, 1700–1980 18

Chapter 2 Formalizing Ecological Sciences, 1870s–1920s29

 A. Plant Ecology.....29

 B. Animal Ecology.....34

 C. Limnology.....40

 D. Marine Ecology44

Chapter 3 Some Specializations57

 A. Organizing Ecologists Before 1946.....57

 B. Symbiosis Studies60

 C. Succession, Community, and Continuum69

 D. Ecosystems, Systems, and Productivity.....77

Chapter 4 Aquatic Ecology87

 A. Limnology in America, 1930S–90s.....87

 B. North America’s Great Lakes91

 C. Marine Ecology, 1920S–90s.....102

 a. Beebe, Bigelow, Ricketts102

 b. Carson, Riley, Cousteau, Clark.....107

 c. Conclusions113

Chapter 5 Aspects of Animal Ecology 119

 A. Physiological Animal Ecology 119

 B. Ethology.....126

 C. Animal Population Ecology 135

 D. Saving Habitats and Managing Wildlife in North America..... 146

Chapter 6	Biogeography.....	161
	A. 1700–1840.....	161
	B. 1840–1940s.....	168
	C. Marine Biogeography, 1697–1940s.....	178
	D. 1950–80.....	184
Chapter 7	Biosphere Ecology.....	193
	Pre-Biogeochemistry.....	193
	Global Questions.....	194
	Food Chains and Webs.....	194
	Earth Moving.....	196
	Ecosystems.....	197
	Biogeochemistry.....	197
	Soils.....	198
	Gaia or Not?.....	199
	Earth System Science.....	201
	Global Warming.....	201
	Phenology Focus.....	201
	Global Warming.....	202
	Biosphere Ecology 207.....	203
